THE BELLEVUE DISCOVERY TEACHERS PRESENT

PAPER TOWEL TIE-DYE

Materials

Plain white paper towels
Food coloring OR a watercolor paint set

Directions

Fold a paper towel until you have a small square.

(To make things easier for tiny fingers, cut the paper towel into quarters before you begin folding)

Dip each corner of the folded towel into the colored water.

Don't hold the folded towel in the colored water too long - color quickly seeps and travels beyond the dipped area.

Let excess colored water drip back into the bowl or color pan before moving on to another section.

When the paper towel is colorful, let it dry overnight.

There are lots of fun ways to use your masterpiece!

Hang finished tie-dyed sheets in the window like stained glass

Use the sheets to wrap gifts.

Cut the sheets into shapes and glue onto paper to make cards or collages.

Make a beautiful butterfly by gathering the sheet in the middle with a wooden clothespin or a colored pipe cleaner.

THE BELLEVUE DISCOVERY TEACHERS PRESENT

Outside Activity-BIRDS and CARS (Hearing the Sounds Around you)

Directions

Ask your children to play a game of “How many sounds can you hear?”

Tell them to close their eyes and listen carefully. They should tell all the different sounds they hear- for example, a car passing, the wind in the tree, an airplane, a bird singing. You can add any sounds you hear that they missed. You can build a “sound collection” if you like, by adding more sounds throughout the days.
