Storytime

When Spring Comes

https://youtu.be/_IMQguVLL4

~Recommended by Miss Annette~

A note from Miss Annette

Gardening is one of my passions. I had such fun with your kids planting bulbs in the fall together. While I did get to share in their experience of noticing the shoots and crocuses, I'm sad I can't be with them now. I would like to see their smiling faces and hear their excited voices as they visit our garden boxes filled with colorful daffodils and tulips. Please take your kids outside this week and see, smell, hear, touch and enjoy the signs and wonders of spring in the garden and world around us. Get out in the fresh air and DISCOVER together!

GARDEN MATH ACTIVITY

- Go to your backyard or on a nature walk.
- Collect things you find in nature and put them in a zip lock baggie:
rocks, leaves, sticks, pinecones ... what else will you find?
- Then come inside and count the number of rocks , leaves , sticks and pinecones.
