Playdough Fun

"Playing with playdough helps to develop imagination."
~Miss Rimi~

Hands-on Science Activity: Dissecting a Flower

"See if you can find all the parts of a flower."
~Miss Becca~

Storytime

Up down and around

<https://youtu.be/FQYPuJXkVpY>

~Miss Beth~

DISSECTING A FLOWER

Take a nature walk and find a flower that you are allowed to pull out of the ground—it's great if you can get the roots of the flower, too.

Dissect the flower. You can use your fingers to examine the flower, including pulling parts off the flower. You can also use a magnifying glass and tweezers if you have them.

Can you find the petals, pistil, stamen, sepal, stem, leaf and roots?

What else do you observe?

The Parts of the Flower
